Relatively new on the literature scene, the genre **Urban Fantasy** encompasses a huge variety of alternative realities, mythologies, and creatures. From vampires and werewolves to fairies, fae, wizards and druids, urban fantasy authors constantly add to the growing genre creating new worlds where magic and technology war, faeries walk amongst us unseen, or vampires and werewolves save and/or prey on humanity. What makes Urban Fantasy books so appealing, however, are the incredibly original plotlines. Mysteries can extend over multiple books, characters evolve, relationships progress. But the best thing about Urban Fantasy? There is a series out there to suit any reader's taste.

Warning: Most Urban Fantasy contains mature adult content. Some series are more violent than others and some contain intense romantic scenes.

Tip: Reading in order is very important. Place holds on all the books in the series, then **suspend** all but the 1st. Once you've received the 1st book, un-suspend book 2...and so on.
