Hidden Figures

By Margot Lee Shetterly

July 25th 7:00 pm

Before John Glenn orbited the earth or Neil Armstrong walked on the moon, a group of dedicated female mathematicians known as "human computers" used pencils, slide rules & adding machines to calculate the numbers that would launch the USA, into space. Among these problem-solvers were a group of exceptionally talented African American women, some of the brightest minds of their generation. -- Provided by publisher.
